授業の目的
This course is designed to give a broad introduction to the issue of urbanization and how it is impacting on health across the world. It will examine different aspects of the urban environment and how the urban environment impacts on different health outcomes. There will also be a focus on how to research about health in an urban environment.

授業の方法
The course will be composed of lectures, discussion and exercises. Reading assignments and short reports should be expected.

授業日程
The course schedule is as follows:

- Lecture 1. The Urban Environment in the Developed and Developing World and its Importance for Human Health (Dr Shoko Konishi, University of Tokyo, Dr Emi Tamaki, Ritsumeikan University). [Wednesday 16 October].
- Lecture 2. Urban Migration and Health (Mr Yosuke Inoue, University of Tokyo). [Monday 21 October].
- Lecture 3. Food and Water – Supply, Quality, Safety and Sustainability in an Urban Environment (Professor Kensuke Fukushi, University of Tokyo). [Wednesday 30 October].
- Lecture 4. Communicable Disease and the Built Environment (Dr Andrew Stickley, University of Tokyo). [Wednesday 6 November].
- Lecture 5. Urbanization and Non-Communicable Disease (Dr Andrew Stickley, University of Tokyo). [Monday 11 November].
- Lecture 6. Studying the Effect of the Urban Environment on Health: GIS and Other Research Methods (Dr Shinya Yasumoto, University of Tokyo; Dr Ikuho Yamada, Chuo University). [Wednesday 20 November].
- Lecture 7. Healthy Cities in the Twenty-First Century (Dr Keiko Nakamura, Tokyo Medical and Dental University). [Wednesday 27 November].
